

Creating Users on macOS Devices via GoLive

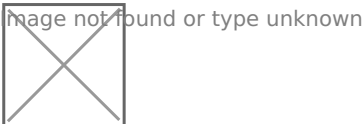

<https://support.addigy.com/hc/en-us/articles/5372112316051-Creating-Users-on-macOS-Devices-via-GoLive>

User accounts can be created on individual macOS Devices using GoLive.

Note: These user accounts will not have a SecureToken initially; however, if a [Bootstrap Token](#) has been escrowed on the device, a SecureToken will be granted after the first login of the created user.

Creating a User Account

1. Navigate to GoLive on the device where the account will be created.
2. Select the **Users** tab.
3. Select New User:

4. In the window that opens, fill in the account credentials for the user:

image not found or type unknown

Note: The username field should not contain spaces.

5. Select **Save**. A prompt will appear confirming that the command was sent:

image not found or type unknown

The Users list will refresh and reflect the newly created account.
