

Add Geo Blocking Middleware to apps

- In Traefik
 - give middleware a name like "geoblock"

Add

Name*

geoblock

Allow Local Requests

Log Local Requests

Log Allowed Requests

Log API Requests

API*

https://get.geojis.io/v1/ip/country/{ip}

API Timeout in ms*

500

Cache Size*

25

Force Monthly Update

Allow Unknown Countries

Unknown Countries API Response*

nil

Blacklist Mode

Add

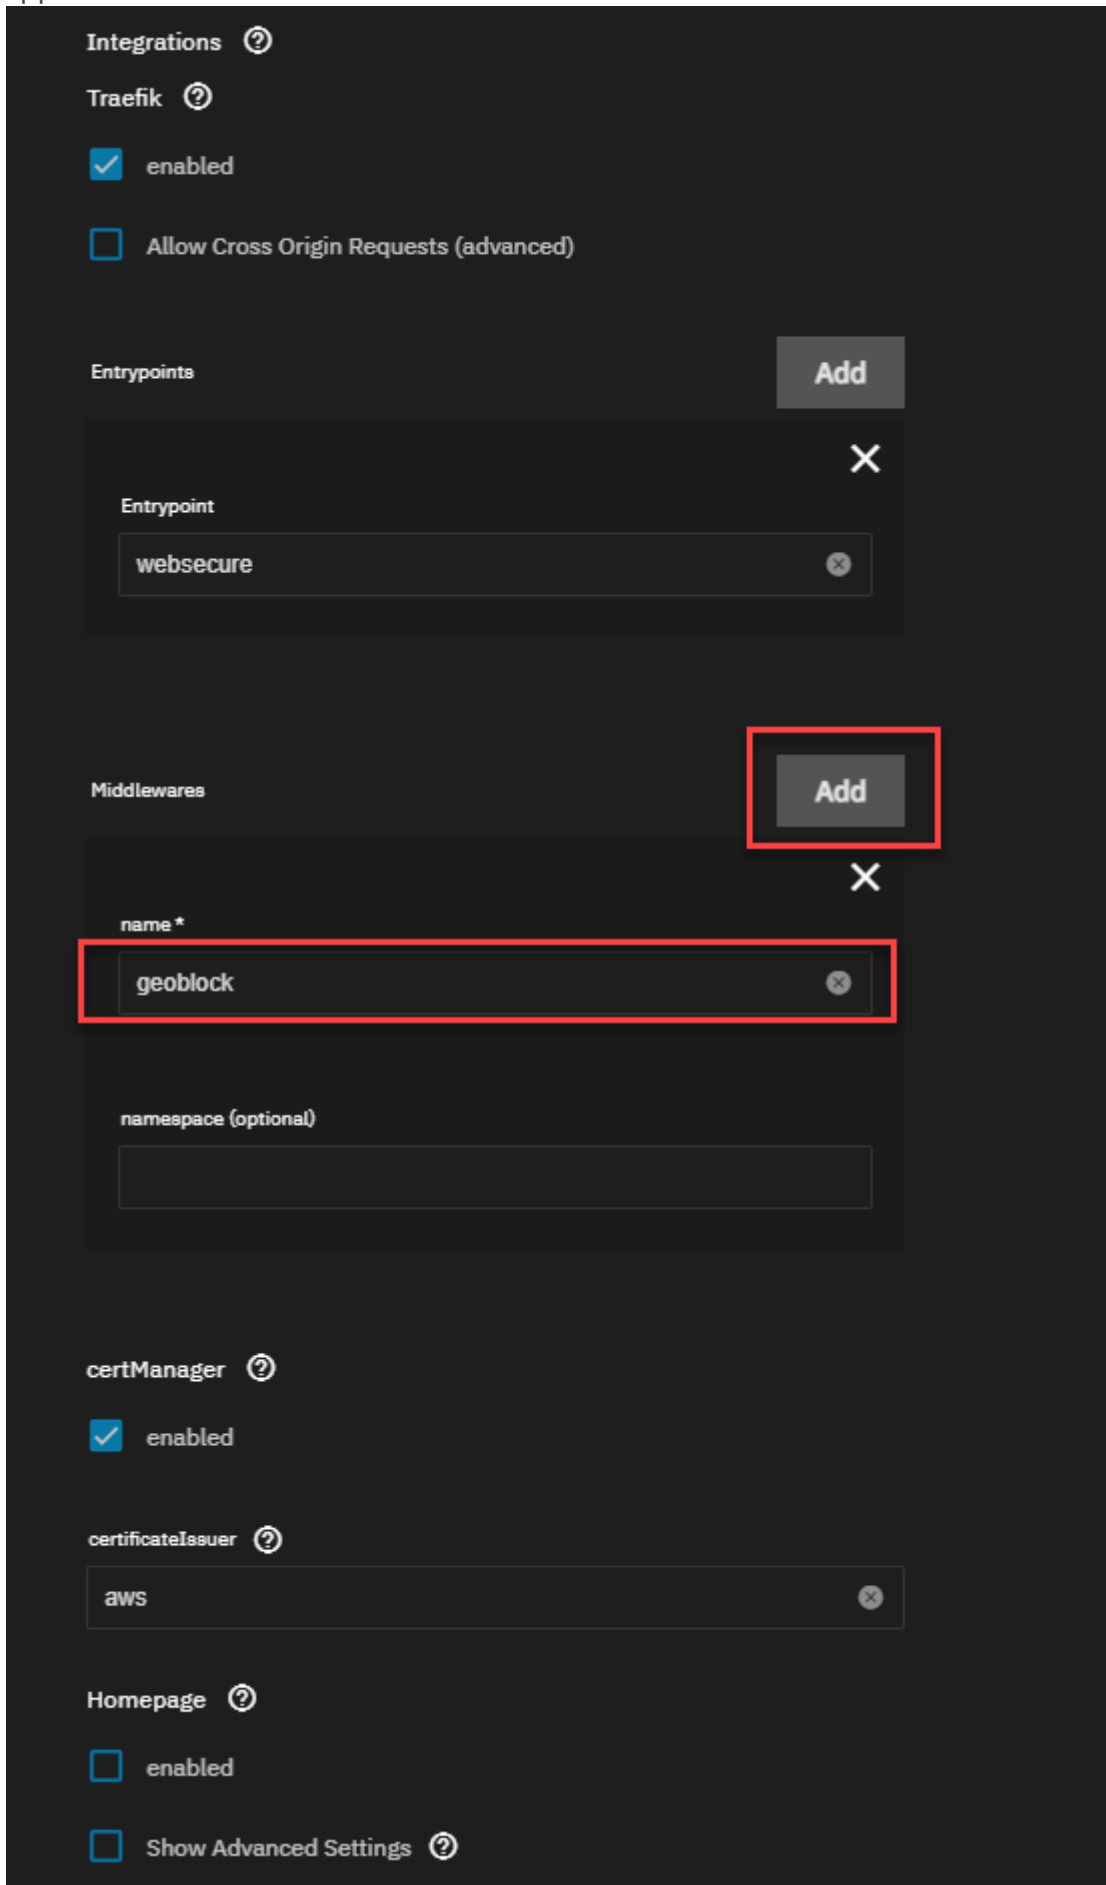

Countries

Country*

US

- Setting blacklist mode will invert the logic, so the listed countries will be blacklisted
- In apps

- set middleware name to the same as name above
