

# Veeam MST Settings

Simplest to open an existing MST and edit fields as necessary to generate a new transform.

Open Current Version of MSI using Orca

```
"X:\Tier2\3  
Software\Veeam_Deployment_v4.0.0.4914\Veeam_MSI\VAC.CommunicationAgent.x64.msi"
```

Apply Transform

Navigate up one directory from MSI:

```
X:\Tier2\3 Software\Veeam_Deployment_v4.0.0.4914\Veeam_MSI
```

Select an existing MST to apply and update

Find the fields that are affected by the transform. Should be Property, and at the very bottom of the page therein

Update VAC\_TENANT, and VAC\_TENANT\_PASSWORD with the appropriate information.

Generate Transform and name appropriately

Provide new MST to Zaelin to update Script.
