

# Bypass Bitlocker and Boot into Safemode

This will allow you to bypass bitlocker and boot into safe mode. This will not bypass encryption, but will allow you to boot into safe mode only.

1. boot into the Windows RE
2. select the command prompt option
3. on the bitlocker prompt choose "skip this drive"
4. once the command prompt appears type `bcdedit /set {default} safeboot network`
5. reboot into safe mode
6. log into the computer
7. do whatever needs done
8. open command prompt and type `bcdedit /deletevalue {default} safeboot`
9. reboot the computer
