

Disable Microsoft 365 / Entra ID Federation with PowerShell

1. [Install the Microsoft Graph PowerShell](#).
2. Set the Execution Policy to Remote Signed:

```
Set-ExecutionPolicy RemoteSigned
```

3. Connect to your Microsoft 365 / Entra ID tenant:

```
Connect-MGGraph -Scopes "Domain.ReadWrite.All", "Directory.AccessAsUser.All",  
"Organization.ReadWrite.All", "Directory.ReadWrite.All"
```

4. Enter your Office 365 Global Administrator Credentials.
5. Consent and Accept the requested scopes.
6. Verify the domain is federated:

```
Get-MgDomain -DomainId "<YourO365Domain.com>"
```

7. Change Federation Authentication from **federated** to **managed**:

```
Update-MgDomain -DomainId "<YourO365Domain.com>" -AuthenticationType Managed
```

8. To check Federation status:

```
Get-MgDomain -DomainId "<YourO365Domain.com>"
```

9. Disconnect Microsoft Graph:

```
Disconnect-MGGraph
```
