## Unlink OneDrive from your computer

You won't lose files or data by unlinking OneDrive from your computer. You can always access your files by signing in to [OneDrive.com](https://onedrive.com).

### Windows 10/11

1. Select the OneDrive cloud in your notification area to show the OneDrive pop-up.  
Blue and white OneDrive icons
2. Go to the **Account** tab.
3. Select the OneDrive Help and Settings icon then select **Settings**

### macOS

1. Click the OneDrive cloud icon up in your Menu bar, click the three dots to open the menu, and select **Preferences**.
2. Go to the **Account** tab.
3. Select **Unlink this PC**.

# Hide or uninstall OneDrive

On some versions of Windows, you can also hide or uninstall OneDrive. You can also uninstall the OneDrive mobile app from Android and iOS devices.
